

ABC COLLEGE

Subject: DBMS

Time: 3 Hours

Maximum Marks: 70

SECTION A

- Q1.** What is data redundancy? *[Marks: 1]*
- Q2.** What is a deadlock in DBMS? *[Marks: 1]*
- Q3.** What is a View in SQL? *[Marks: 1]*
- Q4.** Differentiate between primary key and unique key. *[Marks: 1]*
- Q5.** What is a Database Management System (DBMS)? *[Marks: 1]*
- Q6.** What is a deadlock in DBMS? *[Marks: 1]*
- Q7.** What is concurrency control? *[Marks: 1]*
- Q8.** What is a transaction in DBMS? *[Marks: 1]*
- Q9.** What is a View in SQL? *[Marks: 1]*
- Q10.** Differentiate between DDL, DML, DCL, and TCL. *[Marks: 1]*

SECTION B

- Q1.** What is database recovery? *[Marks: 4]*
- Q2.** What is a JOIN? Explain its types. *[Marks: 4]*
- Q3.** What is an Index and why is it used? *[Marks: 4]*
- Q4.** What is a foreign key? *[Marks: 4]*

Q5. What is an entity in DBMS? *[Marks: 4]*

SECTION C

Q1. Explain 1NF, 2NF, and 3NF. *[Marks: 10]*

Q2. Explain ACID properties. *[Marks: 10]*

Q3. Explain the three-schema architecture of DBMS. *[Marks: 10]*

Q4. What is a Database Management System (DBMS)? *[Marks: 10]*
